342 the hut is always very small, and is closed by a door which slides over the opening on its inner side.

Some houses are much longer than others, with a door at each end and a central partition, so as to form a double hut which is called *epotirikhthars*, *i.e.*, "both-ways-turned house." This kind of hut did not seem to be common, and I only saw three or four examples, of which one is shown in Fig. 8.

A much more common kind of double hut is called *merkalars*, *i.e.*, "other-side house," in which the back part of the hut is partitioned off, with a door at one side.

343

FIG. 8.—THE VILLAGE OF PEIVÒRS, SHOWING A DOUBLE HUT (IN THE BACKGROUND). THE TWO BUILDINGS ON THE LEFT ARE DAIRIES, AND THE STRUCTURE IN THE CENTRE IS A CALF-HOUSE.

166 In some Toda villages there may now be found huts of the
177 same kind as those of the Badagas. In the cases in which I
342 found such huts, I was told that they had been built by Badagas who had lived in the villages while the Toda occupants were away. Todas may also occasionally be found living away from their own villages, usually near tea plantations. They do this because there is a demand for buffalo manure at the plantations, and when living in this way they not uncommonly use huts of the Badaga pattern.

342 In front of the hut on either side of the door there are
352 usually raised seats called *kwottün*, and there are similar

618 621 Each clan possesses a group of villages and takes its name from the chief of these villages, the *etudmad*, and the people of a clan are known as *madol*, or village people.

101 174 616 618 The Tartharol are divided into twelve clans, which take their names from the villages of Nòdrs, Kars, Pan, Tarsdr, Keradr, Kanòdrs, Kwòdrdoni, Pām, Nidrsi, Melgars, Kidmad, and Karsh.[1] The people of each clan are known as Nòdrsol, Karsol, Panol, &c. The Kidmadol and Karshol are much less important than the other ten clans, having split off from the Melgarsol in comparatively recent times. The original number of Tarthar clans appears to have been ten, and I have no record that any clan of this division has become extinct.

The Teivaliol are divided into six clans, or *madol*, taking their names from the villages of Kuudr, Piedr, Kusharf, Keadr, Pedrkars, and Kulhem. The people of Kuudr are called both Kuudrol and Kuurtol, and similarly the people of Piedr and Keadr are often called the Piertol and Keartol.

Here again two clans, the Pedrkarsol and the Kulhemol, are less important than the others. They are offshoots of the Kuudrol, but the separation is of very long standing.

There was some doubt as to the existence of another clan, the Kwaradrol, but it seemed certain that these people, who have now died out, formed a subdivision of the Keadrol.

One Teivali clan has become extinct, its last member having died, it was said, about a hundred years ago. This clan took its name from the village of Kemen, which was near Kiudr, but no trace of this village exists at present and I think it probable that the Kemenol have been extinct longer than the Todas suppose.

166 361 621 The villages of each clan are usually situated in the same part of the hills, though there are very often outlying villages far from the main group. At any one period of the year, only some of the villages of the clan are occupied. The people may move about from one village to another accord-

[1] In these names and throughout the text the signs to indicate long vowels are generally omitted. In order to ascertain the exact method of pronunciation, the map or the list of villages in Appendix III. should be consulted.

ing to the need for pasturage, and the villages in the Kundahs and other outlying parts of the hills appear only to be visited during the dry season before the south-west monsoon sets in.

Each clan is further subdivided, these subdivisions being of two kinds. One, called the *kudr*, is only of ceremonial importance, and we shall meet with it first in the chapter dealing with offerings. The other, called the *pòlm*, is of more practical importance, and is the basis of the machinery for regulating any expenses which fall on the clan as a whole.

778 823 539 following day, the nephew went alone to the spot where the honey was hidden, and found, to his disappointment, that the honey was leaking through the bottom of the bamboo measures, which were transformed into two snakes. Terrified at the sight thereof, he ran away, but [825] the snakes pursued him (may be they were hamadryads, which have the reputation of pursuing human beings). After running a few minutes, he espied a hare (*Lepus nigricollis*) running across his course, and, by a skilful manœuvre, threw his body-cloth over it. Mistaking it for a man, the snakes followed in pursuit of the hare, which, being very fleet of foot, managed to reach the sun, which became obscured by the hoods of the reptiles. [821] This fully accounts for the solar eclipse. The honey, which leaked out of the vessels, became converted into the Paikāra river.

733 166 In connection with the migrations of the herds of buffaloes, Dr. Rivers writes as follows. "At certain seasons of the year, it is customary that the buffaloes both of the village and the ti should migrate from one place to another. Sometimes the village buffaloes are accompanied by all the inhabitants of the village; sometimes the buffaloes are only accompanied by their dairyman and one or more male assistants. There are two chief reasons for these movements of the buffaloes, of which the most urgent is the necessity for new grazing-places . . . . The other chief reason for the migrations is that certain villages and dairies, formerly [796] important and still sacred, are visited for ceremonial purposes, or out of respect to ancient custom." For the following note on a buffalo migration which he came across, I am indebted to Mr. H. C. Wilson. "During the annual migration of buffaloes to the Kundahs, and when they were approaching the bridle-path leading from

Avalanchē to Sispāra, I witnessed an interesting custom. The Toda family had come to a halt on the far side of the path; the females seated themselves on the grass, and awaited the passing of the sacred herd. This herd, which had travelled by a recognised route across country, has to cross the bridle-path some two or three hundred yards above the Avalanchē-Sispāra sign-post. Both the ordinary and sacred herd were on the move together. The former passed up the Sispāra path, while the latter crossed in a line, and proceeded slightly down the hill, eventually crossing the stream and up through the shōlas over the steep hills on the opposite side of the valley. As soon as the sacred herd had crossed the bridle-path, the Toda men, having put down all their household utensils, went to where the women and girls were sitting, and carried them, one by one, over the place where the buffaloes had passed, depositing them on the path above. One of the men told me that the females are not allowed to walk over the track covered by the sacred herd, and have to be carried whenever it is necessary to cross it. This herd has a recognised tract when migrating, and is led by the old buffaloes, who appear to know the exact way."

The tenure under which lands are held by the Todas is summed up as follows by Mr. R. S. Benson in his report on the revenue settlement of the Nilgiris, 1885. "The earliest settlers, and notably Mr. Sullivan, strongly advocated the claim of the Todas to the absolute proprietary right to the plateau [as lords of the soil]; but another school, led by Mr. Lushington, has strongly combated these views, and apparently regarded the Todas as merely occupiers under the ryotwari system in force generally in the Presidency. From the earliest times the Todas have received from the cultivating Badagas
